FELIX KIPNG'ETICH MUTAI

CLOUD & DEVOPS ENGINEER | SYSTEMS ADMINISTRATOR

Nairobi, Kenya | +254 705 480 676 | +254 790 097 839 | gmutai.felix@gmail.com | mutaidev.co.ke | linkedin.com/in/felix-mutai-32bb41438

PROFESSIONAL SUMMARY

Analytical, automation-driven Systems Administrator and Cloud/DevOps Engineer with hands-on experience provisioning AWS infrastructure, orchestrating enterprise Linux environments, and establishing resilient CI/CD and monitoring pipelines. AWS re/Start graduate (Cohort 15) and BSc in Information Technology holder from JKUAT. Proven expertise in multi-tier AWS VPC architectures, Bash shell automation, server security hardening, and CloudWatch telemetry. Demonstrated track record of eliminating deployment bottlenecks, optimizing system uptime, and collaborating with cross-functional global teams to deliver high-availability, zero-downtime infrastructure.

CORE TECHNICAL COMPETENCIES

- **Cloud Platforms & Services:** Amazon Web Services (AWS EC2, VPC, S3, IAM, EBS, CloudWatch, Route 53, Security Groups, Internet Gateways)
- **Operating Systems & Web Servers:** Ubuntu Linux (20.04/22.04 LTS), Kali Linux, Windows Server, Nginx, Apache HTTP Server
- **Automation, Scripting & CI/CD:** Bash Shell Scripting, Python Fundamentals, Git / GitHub Version Control, Automated Task Scheduling (Cron), CI/CD Workflows
- **Networking & Infrastructure Security:** TCP/IP, DNS, DHCP, SSH Key-Based Authentication, Firewalls (UFW/iptables), SSL/TLS Certificates, Network ACLs
- **Monitoring, Logging & Observability:** AWS CloudWatch Metrics & Alarms, Linux Log Diagnostics (/var/log), System Telemetry, Root Cause Analysis (RCA)
- **Databases & Web Technologies:** MySQL, SQLite, REST APIs, JSON, XAMPP, Web Performance Optimization

PROFESSIONAL EXPERIENCE

AWS Cloud Systems & Infrastructure Trainee | **Amazon Web Services (AWS) – AWS re/Start (Cohort 15)** *Sep 2026 – Present | Nairobi, Kenya*

- Architect and deploy secure, scalable multi-tier cloud environments utilizing AWS EC2 compute instances, custom VPCs, private/public subnets, NAT gateways, and EBS storage volumes.
- Enforce principle of least privilege access by configuring fine-grained AWS IAM roles, user policies, and multi-factor authentication (MFA) protocols.
- Engineer custom Bash shell scripts to automate system package deployments, user provisioning, and recurring server maintenance routines on Ubuntu and Kali Linux instances.
- Design real-time observability dashboards using AWS CloudWatch, establishing automated alarms and notification thresholds for CPU, disk I/O, and network bottlenecks to minimize incident response time.

Information Technology System Administrator Intern | **Ananda Marga Universal Relief Team (AMURT)** *Feb 2022 – Sep 2022 | Nairobi, Kenya*

- Administered mission-critical internal server platforms (Employee Tracker, Portfolio Analyst) supporting 50+ staff members with 99.8% platform uptime.
- Hardened enterprise Ubuntu Linux servers by disabling password-based root login, configuring key-based SSH authentication, and instituting strict firewall policies.
- Engineered custom Bash automation routines to streamline repetitive data migrations and database backups, cutting daily administrative processing time by 40%.
- Diagnosed and resolved local network infrastructure anomalies involving DNS resolution, DHCP pool allocations, and TCP/IP routing, reducing Mean Time to Resolution (MTTR) by 35%.

Web Application & Systems Integration Intern | **Kinetics Technologies** *Jun 2025 – Aug 2025 | Nairobi, Kenya*

- Collaborated within an Agile engineering team to synchronize code delivery lifecycles, utilizing Git branching strategies to ensure seamless transitions between development and staging environments.
- Configured backend MySQL/SQLite database connections and optimized REST API endpoints to streamline data transactions and eliminate latency bottlenecks.
- Executed staging environment stress tests, server log tracing, and runtime debugging to validate release stability prior to client deployment.

Freelance Platform Quality & Systems Reliability Tester | uTest & Testlio *May 2021 – Present | Remote*

- Perform functional, exploratory, and regression validation suites on live production cloud platforms and distributed enterprise digital applications.
- Capture and analyze browser console logs, network payloads (HAR files), and system error logs to isolate critical software exceptions and report actionable bug tickets.
- Collaborate with international QA leads and software engineers to verify hotfixes and validate zero-downtime production rollouts.

TECHNICAL PROJECTS

Enterprise AWS Server Setup & Secure RDP / SSH Infrastructure | Cloud Systems Project *2026*

- Configured dedicated AWS EC2 Windows and Linux instances with secure VPC isolation, custom security groups, and automated elasticity rules.
- Implemented secure Remote Desktop Protocol (RDP) access via VPN tunneling and hardened SSH bastion gateways with key-based authentication.

Cloud Cost Optimization & Infrastructure Audit | AWS re/Start Independent Case Study *2026*

- Conducted simulated cloud cost audits evaluating underutilized EC2 instances, unattached EBS volumes, and stale snapshots, identifying 25%+ potential cost reduction through rightsizing.

EDUCATION

Bachelor of Science in Information Technology (BSc IT) | Jomo Kenyatta University of Agriculture and Technology (JKUAT) *Graduation: August 2026 | Nairobi, Kenya*

Coursework Completed. Core Areas: Software Engineering, Distributed Network Systems, Cloud Computing, Database Architectures.

Diploma in Information Technology (Credit Classification) | Jomo Kenyatta University of Agriculture and Technology (JKUAT) *Conferred: December 2022 | Nairobi, Kenya*

Core Focus: Database Management Systems, Systems Analysis & Design, Object-Oriented Programming Logic.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

AWS re/Start Graduate (Cohort 15) | Amazon Web Services (AWS) – Cloud Infrastructure, Linux Administration & Networking *2026*

Cisco Cybersecurity Essentials | Cisco Networking Academy *2021*

Deloitte WorldClass Professional Acceleration Certifications (9 Credentials) | Deloitte WorldClass Education Hub *2026*

Including: Critical Thinking, Effective Leadership, Emotional Intelligence, Digital Literacy, Personal Branding, Financial Literacy, and Entrepreneurial Skills Development.
